

Application No. 10/673,504  
Amendment dated February 13, 2007  
After Final Office Action of November 13, 2006

Docket No.: 0941-1683PUS1

**AMENDMENTS TO THE CLAIMS**

1. (currently amended) A gate drive device for a display, the open sequences for a plurality of scan lines in a panel being changed so that open sequences of the plurality of scan lines between the two adjacent gate drivers being the same, the drive device comprising:
  - a display panel being divided into a plurality of division panels;
  - a plurality of gate drivers being the gate drivers of the plurality of division panels;
  - a plurality of control circuits for connecting the data drivers and the gate drivers of the plurality of division panels; and
  - a timing control register connected to the plurality of control circuits by a plurality of control lines;wherein the timing control register is used for controlling the open timings of the scan lines of the plurality of division panels, the-adjacent scan lines in the joining portions of the plurality of upper-lower adjacent division panels are opened at the same time, and wherein the open timings of the adjacent scan lines in the joining portions of the plurality of upper-lower adjacent division panels are the same.

2.(Cancelled).

3.(Original) The gate drive device of claim 1, wherein the open timings of the scan lines of the plurality of left-right adjacent division panels are the same.
